## HHS Centers for Medicare & Medicaid Services Awards QSSI Additional HIGLAS Transition and Training Support Work

**Columbia, MD** — Maryland-based QSSI was recently awarded additional task orders by the Department of Health & Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) to provide ongoing support to the Healthcare Integrated General Ledger Accounting System (HIGLAS) Transition and Training contracts. As the incumbent contractor, QSSI has supported these critical initiatives since November 2006.

### HIGLAS Transition Support

HIGLAS enables CMS to track Medicare payments and to accurately pay claims for over 40 million Medicare beneficiaries. The transition of Medicare Fee-For-Service (FFS) contractors also provides CMS with enhanced oversight of contractors accounting systems as well as access to more accurate, timely, and consistent data for decision-making and performance evaluations. QSSI provides business integrated services and supports Medicare FFS contractors who are actively engaged in transitioning to the HIGLAS system. QSSI works closely with CMS and each transitioning contractor in order to build and execute a customized transition plan. QSSI delivers both the onsite and offsite support necessary to ensure a smooth and trouble-free transition.

### HIGLAS Training Support

QSSI provides end-users and testers with the training necessary to gain an understanding of concepts and interaction with HIGLAS. Our highly experienced team builds specific HIGLAS training plans and materials for each transitioning contractor, ensuring that all end-users and system testers are equipped with the necessary skills to implement and operate the HIGLAS system.

### About QSSI

Founded in 1997, QSSI is a rapidly growing firm with a broad set of Information Technology (IT) solution offerings. A SEI CMMI® Maturity Level 3 firm, QSSI focuses on enterprise software development, security and privacy services, and critical IT infrastructure solutions as core competencies. QSSI has successfully performed on over 200 Federal civilian contracts and has over 400 IT professionals. Additional information about QSSI may be found at [www.qssinc.com](http://www.qssinc.com).
