## HHS Centers for Medicare & Medicaid Services Awards QSSI the Database Administration in Support of Teradata Platforms Contract

**Columbia, MD** — Maryland-based QSSI has been awarded a prime contract by the Department of Health & Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) to provide database administration in support of the Teradata Platforms Contract. QSSI will maintain the current Teradata environment at CMS, as well as support future program initiatives.

QSSI will provide personnel including Project Management, Team Leads, Teradata Database Administration, and other resources. These teams will perform local and central Teradata database administration, Extract, Transform, and Load (ETL) development and maintenance, and View (Virtual Data Mart) development and maintenance.

The Office of Information Services (OIS) is charged with the support and management of information systems architecture, assets, enterprise databases, accesses to data, and operational systems for CMS. OIS serves thousands of CMS user communities and internally supports dozens of systems and user groups, development projects, and processing platforms.

CMS has a number of new initiatives and technical challenges that include the support of an infrastructure that is essential to the accessibility and maintenance of CMS's data resources. The development of comprehensive methodologies, standards, procedures and software ensures the integrity of the Agency's information base and its supporting information (metadata). Database Administration is a major component of supporting the Agency's information systems and achieving its mission of ensuring effective, up-to-date health care coverage in order to promote quality care for beneficiaries.

### **About QSSI**

Founded in 1997, QSSI is a rapidly growing firm with a broad set of Information Technology (IT) solution offerings. A SEI CMMI® Maturity Level 3 firm, QSSI focuses on enterprise software development, security and privacy services, and critical IT infrastructure solutions as core competencies. QSSI has successfully performed on over 200 Federal civilian contracts and has over 400 IT professionals. Additional information about QSSI may be found at [www.qssinc.com](http://www.qssinc.com).
