QSSI Wins Four-Year Contract to Continue Support of HHS Centers for Medicare & Medicaid Services Recovery Audit Contractor Data Warehouse Project

Columbia, MD — Maryland based QSSI was recently awarded a four-year prime contract with the Department of Health & Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) to continue supporting the Recovery Audit Contractor Data Warehouse (RACDW) project. The RACDW is the repository for all claims reviewed within the Recovery Audit Program at CMS, as well as a critical CMS management tool for overseeing Recovery Audit Contractor (RAC) activity, tracking collections, and reimbursements. The RACDW is used by CMS to coordinate payment review activities, and is the principal means for the RACs to report improper payment findings to CMS. Since 2008, QSSI has provided key support to the RACDW project. QSSI migrated a legacy system to a secure hosting facility and supported a nationwide rollout and expansion of the Recovery Audit Program.

The scope of work under this new contract includes hosting, maintenance, and enhancement of the existing internet-based RACDW, as well as continuing requirements development toward the eventual migration of the system to CMS' Enterprise Data Center (EDC).

About QSSI

Founded in 1997, QSSI is a rapidly growing firm with a broad set of information technology solution offerings. A SEI CMMI® Maturity Level 3 firm, QSSI focuses on enterprise software development, security and privacy services, and critical IT infrastructure solutions as core competencies. QSSI has successfully performed on over 200 Federal civilian contracts and has over 400 IT professionals. Additional information about QSSI may be found at www.qssinc.com.
