QSSI to Support Mimic with the Department of Defense's Automated Support for the da Vinci Surgical System Contract

Columbia, MD — Maryland-based QSSI, in partnership with Mimic Technologies, Inc. (Mimic), was awarded a contract under the Department of Defense (DoD), Army Branch, Small Business Technology Transfer (STTR) Program to provide automated support of its robotic surgical training, operations, and outcomes initiative. This contract is focused on the development of an automated system that collects and analyzes diverse data on robotic surgery training tasks; identifies variances in operative care; and provides clinically relevant decision support to improve performance and outcomes.

QSSI will support the Phase 2 study, including the design of a flexible, scalable, interoperable, and secure system compatible with the proposed Virtual Lifetime Electronic Records (VLER) and Nationwide Health Information Network (NHIN).

About Mimic Technologies, Inc.

Mimic is a privately held company headquartered in Seattle, Washington. Mr. Jeff Berkley, Mimic's president and founder, began working as a consultant for a surgery simulation company in 1996, where his focus was real-time continuum mechanic based modeling of soft tissue. It was during Mr. Berkley's PhD work at the world renowned Human Interface Technology (HIT) Laboratory at the University of Washington (UW) that Mr. Berkley founded Mimic Technologies, Inc. in March 2001. Mimic's objective was to provide new solutions that would enable a more realistic simulation experience through software and hardware.

About QSSI

Founded in 1997, QSSI is a rapidly growing firm with a broad set of Information Technology solution offerings. A SEI CMMI® Maturity Level 3 firm, QSSI focuses on enterprise software development, security and privacy services, and critical IT infrastructure solutions as core competencies. QSSI has successfully performed on over 200 Federal civilian contracts and has over 400 IT professionals. Additional information about QSSI may be found at www.qssinc.com.
